“Axia means value”

Axia is an innovative breeding company, specialised in creating vegetable seeds for protected crops. We run a dedicated program for heated greenhouses, with or without artificial light. Our breeding programme is characterised by a strong focus on taste and healthy ingredients, with a very high yield.

Dear relation,

We are happy to present you our new catalogue for season 2024. At Axia we find it quite normal that we have a large number of (exclusive) varieties, promptly and flexibly available, well known for their taste, vitality, flowering speed and their high yield per square meter.

We have added a number of new potential contenders to our catalogue including our new ToBRFV resistant varieties. These varieties can be recognized by the XR logo. .

However, what really distinguishes us from others is our partnership with growers. This means short lines between you and us, but you will also experience this in the tight cooperation between breeding, sales and crop advisors.

That we are growers ourselves shows in service, support and cultivation guidance that we offer. We are 'growers for growers' and therefore you are always cordially welcome in our demonstration greenhouse to judge your tomatoes during their crop seasons.

Our crop specialists are pleased to inform you about all the cultivation aspects of our varieties.

The tomato team of
Axia Vegetable Seeds B.V.

At Axia Vegetable Seeds, we understand the considerable financial impact of the Tomato Brown Rugose Fruit Virus (ToBRFV) on the tomato industry. Our committed breeding team is working diligently to develop resistant (HR) varieties, crossing this resistance into existing commercial varieties.

Following a thoughtful selection process, we have incorporated this resistance into a range of varieties that underwent thorough testing and received approval during the 2023 growing season.

PRUNAXX

- ✓ HTR2204272
- ✓ F1 hybrid tomato
- ✓ Cluster medium plum tomato
- ✓ Pruning advice: 5 - 6 fruits per cluster

FlavorAx is a group of tomatoes with similar characteristics. All the tomatoes in the series have deep red fruit color with dark red flesh. The inside consists of a typical green gel. The tomatoes have a traditional flat-round shape, strong green calyxes, and a thin skin. The tomatoes also provide an authentic taste experience: there is a nice balance between sweet and sour with an herby aftertaste.

There are various choices in fruit weight from 35 to 180 grams: This makes the FlavorAx range unique and distinctive from other lines in the market. FlavorAx includes cocktail-, TOV's and beef varieties.

The FlavorAx tomatoes are suitable for many purposes due to the different fruit weights and taste properties. They can be used for snacking, salads, or cooking. Due to its beautiful shape and color, the tomato is extremely suitable for the premium segment and they are distinctive within the category.

Fun fact: the name of the tomato group was of course not chosen that way by chance. It is a composition of Flavor and Ax. Flavor refers to taste, Ax stands for "axis" and refers to the typical inside. In addition, Ax naturally fits well with Axia, as we do in all our variety names.

HTL1709514
