“Axia means value”

Axia is an innovative breeding company specializing in the development of vegetable seeds for protected cultivation. We operate a dedicated program for heated greenhouses, both with and without supplemental lighting. Our breeding program is distinguished by a strong focus on flavor, nutritious qualities, and exceptionally high yield.

Dear partner,

We are pleased to present our new catalog for the 2026 season. At Axia, we offer a wide selection of varieties that are readily available and known for their excellent taste, vitality, quick flowering, and high yield per square meter.

In response to the Tomato Brown Rugose Fruit Virus (ToBRFV), we have developed high-resistant (HR) varieties, incorporating this resistance into our commercial lines. These ToBRFV-resistant varieties, marked with the XR logo, have undergone thorough testing and are now available in our catalog. 

The FlavorAx range offers premium tomatoes with a deep red color, green gel, and balanced flavour- sweet, slightly acidic, and herbal. Available in weights from 35 to 180 grams, including cocktail, TOV, and beef varieties, they are perfect for snacking, salads, and cooking. Recognizable by the FlavorAx logo, these tomatoes are ideal for the premium segment.

What truly sets us apart is our partnership with growers. This close collaboration ensures seamless communication and cooperation between our breeding, sales, and crop advisory teams. As growers ourselves, we are proud to offer personalized service, support, and cultivation guidance.

We invite you to visit our demonstration greenhouse to evaluate our varieties in action. Our crop specialists are happy to assist you with all aspects of cultivation.

The tomato team of
Axia Vegetable Seeds B.V.

Berry Tomatoes

HTR2533011

Available for trials

HR: TOBRFV / TOMV:0-2 / PF:B,D / FOL:0

IR: Ma / Mi / Mj

- ✓ Berry plum tomato
- ✓ For loose harvest
- ✓ Protected heated
- ✓ 4 - 8 gram
- ✓ Strong plant
- ✓ Fast flowering speed
